

# FloorScore® Private Label Certification

## What is it?

FloorScore® Private Label certification is available to customers of certified manufacturers so that they can re-brand SCS certified products under their own company. Customers will undergo a Private Label certification assessment to use the FloorScore brand and logo.

Upon approval, they will receive a unique SCS certification number and certificate. This protects the confidential relationship between the manufacturer (supplier) and the private label holder.

## Benefits of FloorScore Private Label certification

- Tailors each unique FloorScore certificate to the certificate holders and their products
- Meets the requirements of California Specification 01350
- Qualifies for international green building rating systems: BREEAM International, BREEAM UK, Collaborative for High Performance Schools (CHPS), Green Globes, Green Guide for Health Care 2.2, LEED 2009, LEED v4, WELL Building Standard and more
- Promotes safer, healthier work and home environments
