

# Responsible Sourcing

## Advisory and Verification Services

### What is it?

SCS provides customized supply chain solutions that help companies strengthen their sustainability goals, build their reputation, lower the risks in their supply chain, and meet consumer and stakeholder demands for more sustainable products.

### What we do

Our advisory services range from initial design of a sustainable sourcing strategy to developing specific criteria for supplier audits. We take your goals and criteria and translate them into a field or factory-level verification program, from pilot phase to program launch. Our industry expertise includes agriculture, mining and minerals, health and wellness products, apparel, and more.

### Service Offerings

- Responsible sourcing policy
- Risk-based ranking systems
- Life cycle assessment to evaluate impacts
- Supplier questionnaires
- Code of conduct development and review
- Sustainable sourcing criteria and metrics development
- Benchmarking with existing schemes and standards
- Piloting supplier audits/assessments
- Education and training of staff and suppliers
- Ongoing verification of supplier performance
